Taking your plant from seed to sprout to full-bloom is a miraculous and therapeutic experience. Growing great cannabis takes a bit of forethought and preparation, however. It's best to do your research ahead of time and plan out what approach you're going to take with your plants.

Achievethecore.org :: From Seed to Plant

To grow plants from seed, start them indoors in pots to protect them from diseases, insects, and bad weather. When you plant them, use a seed starting mix and put 1 or 2 seeds in each pot. While you're waiting for the seeds to sprout, keep them in a warm spot with indirect sunlight. Also, make sure the soil the seeds are planted in is always moist.

Growing Cannabis Seeds: Here's Everything You Need To Know ...

Use your label to make a 1/4 inch furrow in the planting mix. Sprinkle 2-3 seeds into the furrow and cover them with a sprinkling of potting mix. Gently firm the mix down, so the seeds make good contact with the soil. You can spray the surface with water if it doesn't feel moist enough.

Editions of From Seed to Plant by Gail Gibbons

The goal with seed starting is to have your seedlings ready to go outside when the weather is favorable. Start by looking at the seed packet, which should tell you when to start seeds inside. Usually, it will say something like, "Plant inside six to eight weeks before last frost."
